

random

## Mission Statement

Fractal aims to educate anyone pursuing to better themselves. We want to enable, guide, and empower every person to change their lives and accomplish all goals they set out to reach.

# Overview

1. Our mission informs our values and, as you will read below, are the pillars upon which Fractal is built. In order to provide our service and make a difference, these values must drive the how and why of our actions and our decisions, and bring us back together every day. This is how, by applying **FRACTAL**, our mission becomes reality.
2. Use case: Fractal has created Random(**RNDM**) as a deflationary token with the intent of running a full economy across all platforms built and maintained by Fractal. RNDM will be the premium currency of all Fractal software and gaming operations.
3. RNDM excels in creating both demand and incentive to **HODL** as users are rewarded random airdrops for holding, but also receive in-game items and other digital loot via RNDM purchases.
4. RNDM collects a 3% transaction fee. 2% is returned to **ALL** holders via completely randomly occurring airdrops of random amounts. 1% is also collected and burned immediately.

# Our Values

## Values

- **Fun**
  - Creativity breeds ideas, fun, and revolutionary work. Always strive to create a positive, energizing, and most importantly, fun work experience for all.
- **Respect**
  - If we care about others, we should strive to help them learn, motivate them, encourage them, and help them grow. We always want to lift up those around us and show them respect.
- **Accountability**
  - We should hold each other to the highest standard, ensuring every team member is set up for success and that both the team and individuals are held accountable.
- **Creativity**
  - Be open minded, think outside of the box, be willing to jump on hard problems, be willing to ask for help, but most importantly, solve problems; don't create them.
- **Transparency**
  - We are in this together, we should never say things or make decisions we aren't comfortable with the entire staff or our users knowing about. Say what you mean and mean what you say.
- **Adaptability**
  - None of us are perfect and will make mistakes daily. Always remember there is room for improvement and each mistake is just a wrong way to accomplish something.
- **Leadership**
  - Being a leader is more than just a title. It is being willing to actively involve yourself with problems within the team, nurturing the team, and working alongside them instead of above. Always strive to be a team player and treat each other with respect.

# Abstract

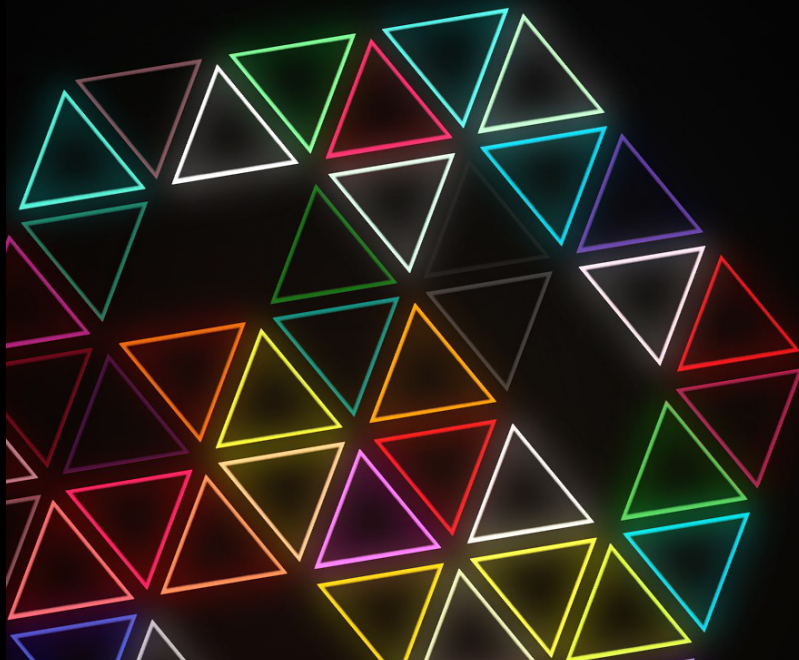

In this whitepaper, you will find that Random is a token created with the purpose of helping fuel education and attention to those who need it most. By creating a vast educational and gaming platform, Fractal intends to use RNDM to keep our users focused on our values and our mission and obtaining their goals. By keeping the token transaction friendly and supplying these transaction fees back to our holders randomly, we strive to keep our attention toward our community and our users. Fairly distributing tokens to our users to be used toward their own personal goals or to keep it in our ecosystem, we truly believe in keeping the power in the hands of the people, giving them the means to gain their financial and educational freedom, and allowing them the ability to create freely.

# Introduction

The idea behind Fractal is to bring fun into the cryptoverse, allowing investors and novices alike to enjoy and learn about crypto, as well as to receive exclusive awards and airdrops. Here at Fractal, we enjoy the idea behind Chaos Theory and want to throw a little of it into cryptocurrency, via our token **Random (RNDM)**.

## Our Goals

1. To bring education, gaming, and fun to the cryptocurrency universe; giving our users the tools to achieve their goals.
2. To randomly and fairly distribute processing fees back into the wallets of our holders.
3. Add education as a means of mining cryptocurrency, so that users can both learn and.
4. Allow our holders to seamlessly and easily transact across our multi-purpose platform in a user-friendly peer-to-peer network designed to be run by users.
5. Giving back to education and helping instruct children to set them up for success in the future in helpful and productive ways.

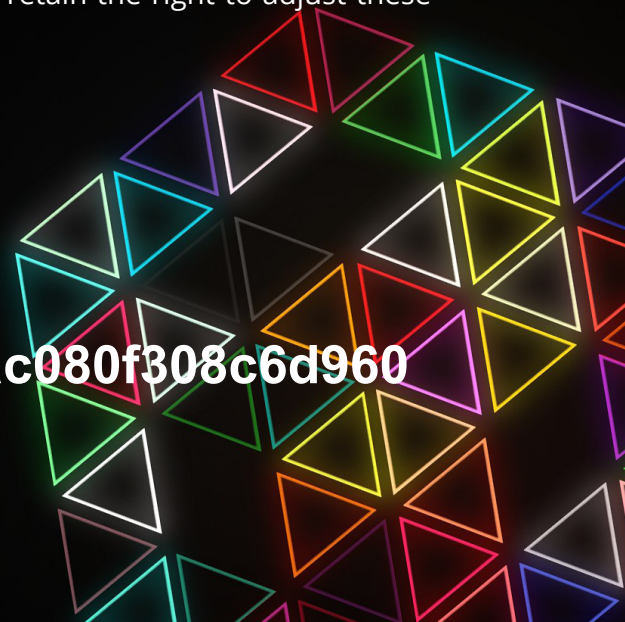

# Wallet Allocations

Fractal has minted 2 billion RNDM coins on the Binance Smart Chain. The coins will initially be held in three different wallets:

1. Public wallet (500M): for initial sale and distribution to the public and investors.
  - a. Address: 0xa809CEE09502982f9467f04A56C553f84B1d8a28
  - b. 5M - To be used for marketing and promotional materials.
  - c. 10M - Held on reserve to pay both staff and use burn for funsies.
  - d. 15M - For initial ICO: 5M offer with 10M to burn upon completion.
2. Distribution wallet (Filled by fees): for random distribution, decided randomly, to wallets that contain any amount of RNDM.
  - a. Address: 0x9A00aaC1409535CF598E7a0a3A9B4bFaFfeccD4D
3. Platform and listing wallet (1.5B): to be used to run and distribute the educational and gaming aspect of Fractal and provide funding for those projects. This wallet will also allow for conversion to any other Fractal token created as well as the inverse. No more than 10% may be removed from the wallet within a 6 month period, to prevent Fractal from dumping the coin for personal gain.
  - a. Address: Contract Address
4. Fractal will retain 2% of all transactions to be added to the distribution wallet for redistribution and 1% of the transaction will be burned. In the unlikely event of radical volume change and/or price movement, we retain the right to adjust these percentages to protect the integrity of this project.

Contract Address:

**0x52a3d5723849da6faaf1cbedaac080f308c6d960**

# Roadmap

## I. Fractal Website: May 2021 (Complete)

We intend to have the Fractal website up and running no later than May 1, 2021. The website will serve as a landing page for investors and interested parties to consult the details of our educational platform, as well as the gaming and collectible artwork arms of our project.

## II. RNDM generation: May 2021 (Complete)

Minting and refining the tokenomics of RNDM will be concluded and ready for distribution by May 1, 2021.

## III. RNDM ICO: May - June 4th 2021 (Complete)

RNDM will be offered for purchase to investors. Investment will be held on the Fractal website. Initial token price will be predetermined and remain static for the duration of the ICO. All proceeds from this sale will be put toward production of educational materials and platform development.

## IV. RNDM public listing: October 2021 - Ongoing

RNDM will be listed immediately following the ICO on Pancakeswap and 1Inch, backed by a locked liquidity that will be renewed every 3 months. This will ensure upon platform complications, RNDM liquidity won't be tied up for long periods of time.

## V. Lexicon: The Chaos of Cantor (Trading) May - October 2021

During the summer and fall months of 2021, Fractal will be in active development of our one-of-a-kind digital trading card game, Lexicon. Lexicon will give that nostalgic feel of opening legendary and chaotic rare digital cards to be used for trading or battling with peers. All cards and booster packs are pre-minted and will not be recreated after original release. Expansions will be created incrementally over the lifespan of the game.

## VI. Lexicon: CoC (Gameplay): May 2022

Lexicon gameplay and battle strategies will be developed concurrently with the trading aspect of the game. Fractal aims for perfection, so we have pushed the gameplay aspect to 2022, releasing a Beta version to RNDM holders in January 2022.

## VII. Fractal Studios: 2021 Project Pipeline: Ongoing

Fractal has planned the following projects to be created and released by Fractal throughout 2021 as well as a continuance into 2022.

- Fractal ICO: We will create a repeatable ICO software in which users may purchase a license/website from us. This will have three tiers or purchase.
  - Base tier: Will come without branding and only have RNDM as a trading pair.
  - Exclusive tier: Will come with branding access and have a wide selection of cryptocurrency options.
  - Chaotic tier: Will come with Exclusive tier package and the Coin Minter application.
- Fractal Platformer: We are actively developing a 2D platformer game to release to our users.
- Fractal Coin Minter: We will create a smart contract generator to be sold so that the buyer may create and mint a coin on the BSC. (Pairs well with the ICO software).
- FractalCraft: We have developed and released a Minecraft server built with Enjin to allow for our users to utilize cryptocurrency within our Minecraft server exclusive to RNDM holders.
- The Lexicon: The central and monolithic exchange of the Fractal ecosystem allowing accounts to exchange in-game items and digital goods with others. RNDM will run this exchange.

## VIII. Fractal after RNDM: 2022 - Ongoing

Fractal, upon a successful release and adoption of RNDM, will begin the process of minting further exclusive coins for the Fractal ecosystem. Driven by community interest and development, we will release a gaming platform to be run by individual tokens as well as RNDM. These will include the spaces of eSports, education, sports, and music.

## IX. Educational Platform: 2023 - Ongoing

After funding is secured and our website development is underway, Fractal will dedicate a branch of its resources to developing and bettering our educational platform, allowing for users to mine cryptocurrency while learning. Kids will have the ability to purchase artwork, trading cards, and loot boxes using their mined currency. Adults will be able to exchange this currency for any other cryptocurrency as well as turn it into cash.

# Meet The Team

## Team Members

**Dylan Nelson** - Creative Director

**Dylan Stinson** - Streaming and Gaming Lead

**Alfie Schuurmans** - Community Legend and King Technical Analysis Bae

**Jordan Cain** - Gamemaster of Lexicon

**Rares Enea** - Creative and Social Media Rep

**Felix Gostel** - Creative and Social Media Rep

**Erik Krause** - Editor and Social Media Rep

**'Azazel'** - Graphic Artist

**'Micee'** - Vape Queen and Social Media Rep

**'Gewesseld'** - Development and Website Design

- To learn more about the team, visit the website's Meet the Team section
