

Investment idea:

Creation of a closed pool of investors and partners, with a total capitalization of \$80 million for risk-free co-investment of high-yield projects of Si14 group of companies on means of investor's acquisition of AAA, AA class Eurobonds (secured by bank and state guarantees). Thus, the risk of loss of deposit is eliminated and the subject of investment is only coupon yield accrued on these bonds, which is exchanged for equity participation in the project and subsequent dividends from it.

Important: The Eurobonds are held on the investor's personal brokerage account with the leading Russian and EU banks, under his full control.

Si14 LLC only invests in the coupon yield, according to the Eurobonds, for the use of which the investor, **after 36 months**, gets a share in the company.

Si14 LLC today:

Si14 LLC has decades of experience in asset management, a professional team and over a dozen successful projects, including IPO.

- *Si14 share capital is over \$20,000,000*
- *The Si14Bet project is currently estimated at \$300,000,000.*

Our main task:

Within a short period of time (**no more than 36 months**) scale up own high-yield projects to joint-stock companies (IPO), with subsequent distribution of shares (stock) among partners and investors.

Ready 1:

Now we are open for cooperation to create a unique international exchange *Si14Bet on the market of sports betting events.*

The uniqueness of Si14Bet consists of three key components:

- **Constantly growing** sports betting market, the capitalization of which is rapidly increasing and is not affected by such factors as currency volatility, crisis, as well as geopolitical risks. On the contrary, statistics show that all the above events only increase the capitalization of this market.
- **The demand for the Si14Bet platform** is conditioned by the high technology and transparent model of interaction with users. It is this model that allows solving all the pains and difficulties of professional market participants who cannot realize their knowledge and strategies through classical betting companies.
- **High technology** and innovative services of Si14Bet will allow platform participants to maximally realize and monetize their skills.

In confirmation of this, even before the launch of the platform, we have received over **10,000 applications** for participation from professional players, which allows us to calculate with Swiss precision the project implementation time and payback.

A step-by-step algorithm for cooperation with us:

- 1) An investor buys **AAA,AA class Eurobonds** in his name with a minimum maturity of 36 months through the leading partner banks.
2. The investor still **owns Eurobonds**, which have coupon yield.
- 3) The investor enters into an agreement on the distribution of coupon yield for a **period of 36 months**, on account of Si14 LLC, in exchange for equity participation in the project.
4. **After 36 months**, the investor can sell the Eurobonds and dispose of the investment body in his own interests.
5. In exchange for the **coupon yield received**, Si14 LLC includes the investor in the equity participation.
6. The investor opens an **account with a Swiss** bank and notarizes the equity participation, which begins to yield dividends.
7. **With the body of the investment**, the company's share and the increasing dividends in hand, the investor is offered the following high yield project with the same co-financing model.
8. Thus, the investor, during several years of cooperation with us, can receive dividends from equity participation in highly profitable international companies, with complete absence of risks and **100% control over their assets**.

Si¹⁴

**SUCCESSFUL
INVESTMENT**

Requirements for an investor:

- **The minimum deposit** for equity participation in the project is 200 000 USD;
Conditioned by the minimum lot value when buying a Eurobond
