EXECUTIVE SUMMARY

Ctomorrow leverages AI precision and blockchain for real-time health and beauty analysis. Its Smart Data Factory integrates AI skin scanning with personalized cosmetic solutions and features an S2E (Scan to Earn) reward system.

TokenInsight has evaluated Ctomorrow from 6 dimensions based on our standardized rating methodology.

Based on the methodology, TokenInsight gives Ctomorrow a rating of CCC, with a Positive outlook.

Technology & Security

- Ctomorrow is a personalized skin care health monitoring and management platform that utilizes AI precision and blockchain technology to provide real-time health and beauty analysis.
- Its Smart Data Factory utilize AI skin scanning to provide personalized cosmetic solution with a Scan to Earn reward system.
- The token smart contract has been audited with no vulnerabilities found.

Roadmap & Progress

- Ctomorrow discloses 2024 roadmap, however, the roadmap is relatively simple and lacks details.

Token Economics

- Project token \$CTP plays a crucial role in Ctomorrow ecosystem, it serves as an incentive mechanism and can be used as a medium of exchange in the ecosystem.

Token Performance

- \$CTP has been listed in three CEX including Gate, LBank, and MEXC, the trading activities is moderate.

Team, Partners & Investors

- The work experience of core members is involved in blockchain, payment-related technology, data, and business fields.
- The project has established partnerships with a number of web 3 companies.

Ecosystem Development

- Ctomorrow has both English and Korean community and build modest amount of followers, the communities is not very active.

01.

TECHNOLOGY & SECURITY

Ctomorrow is a personalized technology platform focused on personal health monitoring and management. The platform leverages mobile technology and blockchain to provide real-time health and beauty diagnosis with a metaverse experience to users. The platform uses the protocol token \$CTP to incentivize users behaviors and serves as a reward token and is used for transactions in the ecosystem.

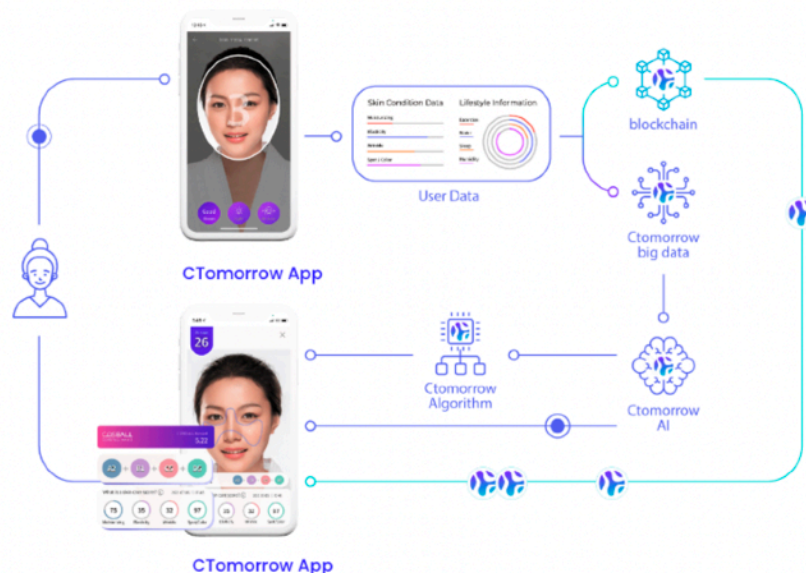

Ctomorrow features four core products. Its mobile applications employ skin care technology to analyze the user's skin across close to a dozen parameters. The data collected is processed by the Smart Data Factory, which then informs Ctomorrow's AI. Leveraging patented algorithm technology, the AI generates personalized health reports and recommendations for users. Additionally, Ctomorrow has developed its data storage and transport layers using IPFS, a decentralized, peer-to-peer file storage protocol.

Ctomorrow DID (Decentralized identifiers) offers a set of authorization APIs that developers can utilize to enable their users to connect and share data externally, thereby enhancing engagement with other websites and applications through their Ctomorrow accounts.

Ctomorrow's dynamic NFT Avatars offer personalized avatars created from users' initial facial scans. These avatars evolve over time, reflecting changes in users' personal attributes and progress with health and beauty solutions.

▸ Ctomorrow Business Flow

Source: Ctomorrow

Within the Ctomorrow ecosystem, users contribute data—facial scans and lifestyle surveys—via the application. This data is then integrated into the smart data factory and processed by Ctomorrow's algorithms and AI. Additionally, Ctomorrow factors in weather conditions to provide tailored skin care recommendations and collaborates with a customized cosmetic brand COSBALL to suggest specific skin care products.

In the current landscape of health-related applications, one critical challenge is how to incentivise users to provide their biometric data. In the Ctomorrow ecosystem, users are rewarded with the project's \$CTP Token as an incentive mechanism in exchange for the user providing their skin analysis information through the skin scanning AI feature in the CTomorrow App.

1.1 Code Audit

Ctomorrow's \$CTP token smart contract was audited by HAECHI AUDIT in Jan 2022. There is no critical issue identified. The audit report mentioned two tips aimed at enhancing the token code's usability and efficiency.

▸ Ctomorrow HAECHI Audit Summary

Source: HAECHI. TokenInsight

The codes used in this Audit can be found at BscScan

(<https://bscscan.com/address/0xb850CAC12Ab85d4400db61ac78DC5Fc2418b6868#code>).

Issues

HAECHI AUDIT found 0 critical issues, 0 major issues, and 0 minor issues. There are 2 tips explained that would improve the code's usability or efficiency upon modification.

02.

ROADMAP & PROGRESS

The Ctomorrow Platform started in September 2021. The CTomorrow App was released in the 4th quarter of 2023 and is available on both the App Store and Google Play Store.

The project discloses its 2024 quarterly roadmap on its website. The overall project roadmap appears relatively simple, lacking in comprehensive details.

▸ Ctomorrow 2024 Roadmap

Source: Ctomorrow, TokenInsight

Stage	Milestones
2024 Q1	<ul style="list-style-type: none"> • Update CTomorrow App • CTomorrow App Renewal
2024 Q2	<ul style="list-style-type: none"> • Token listing on major exchanges • App Renewal
2024 Q3	<ul style="list-style-type: none"> • Development of skin tech lab • Opening of partners shopping malls within the app • Partners advertising and View2Earn (V2E) system
2024 Q4	<ul style="list-style-type: none"> • Development of Decentralised ID (DID) utilising skin data • Introduction of skin information on the Blockchain (BSC) • Development of Bidding-based advertising platform

03.

TOKEN ECONOMICS

3.1 Ctomorrow Platform Token \$CTP

\$CTP is the native token of the Ctomorrow Platform. Presently, it can currently be used to purchase cosmetics products at a discounted rate on the CTomorrow App. Currently in the \$CTP Development pipeline is transforming \$CTP into a crucial component of the reward mining program. Users will be able to receive \$CTP as a reward for providing valuable skin data.

3.2 Tokens Distribution

\$CTP is an BEP20 token on the BSC blockchain, the total supply of \$CTP is 9,000,000,000. 42.7% of the \$CTP is allocated to the partners, founders, team, advisors, and pre-sale.

▸ \$CTP Token Allocation Plan

Source: Ctomorrow, TokenInsight

Category	Allocation	Amount	Vesting Plan
Big Data Mining	25%	2,250,000,000	Halving Vesting year by year
Collaboration Partners	14.0%	1,260,000,000	24 months vesting
Pre-Sale	9.7%	873,000,000	20 months vesting
Foundation	10.0%	900,000,000	24 months vesting
Ecosystem	9.0%	810,000,000	24 months vesting
Founders	9.0%	810,000,000	24 months vesting
Marketing	8.3%	747,000,000	24 months vesting
Team	7.0%	630,000,000	24 months vesting
Floating Liquidity	5.0%	450,000,000	24 months vesting
Advisors	3.0%	270,000,000	24 months vesting

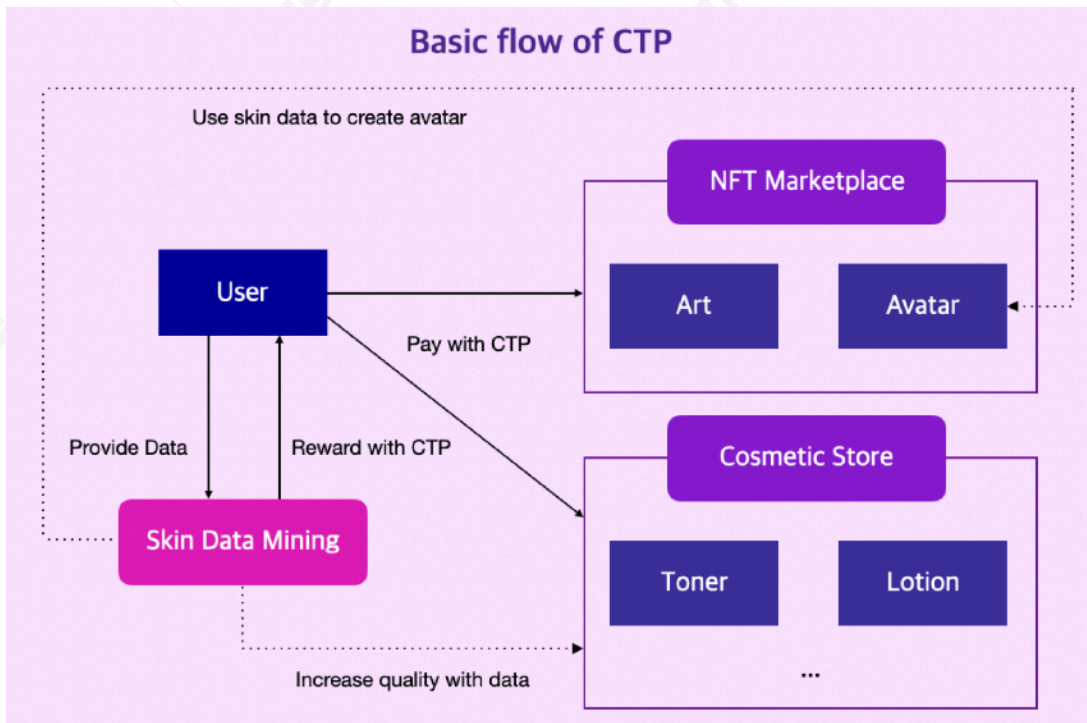

3.3 Tokens Use Cases

\$CTP Token serves as an incentive mechanism for users to be rewarded for providing skin care data, this data positively contributes to its ecosystem. According to the whitepaper, users receive \$CTP as mining rewards for providing data to CTomorrow which entitles the users to receive special discounts on the projects partners' products and services when paying in \$CTP.

CTomorrow also plans to utilize the collected data by selling the data to relevant industries who can use the data to enhance products and services such as healthcare, beauty products, the payment method in this exchange will also be in \$CTP.

▸ \$CTP Token Utility within Ctomorrow Ecosystem

Source: Ctomorrow, TokenInsight

04.

TOKEN PERFORMANCE

4.1 On-chain Statistics

The \$CTP token is deployed on BSC Chain. As of June 06, 2024, there are 27,751 holders on BSC. According to data from Bscscan, the top 10 addresses excluding smart contract and centralized exchanges hold 75.6% total supply. It should note majority of the tokens are held by addresses related to the project.

4.2 Trading Information

\$CTP has been listed on three centralized exchanges, including Gate, LBank, and MEXC, and has liquidity pool on decentralized exchange PancakeSwap.

▸ \$CTP Key Metrics

Source: TokenInsight, 06 June 2024

Key Metrics	
Price	\$0.0042
24H Spot Volume	\$508,375
L/H (Today)	\$0.0045 / \$0.00456
L/H (30D)	\$0.0041 / \$0.0059
ATH	\$0.97 2022-02-05
Market Cap	\$38,199,870
Circulating Supply	8,437,500,000
Max Supply	9,000,000,000
Listed Exchange	Gate, LBank, MEXC, PancakeSwap

05.

TEAM, PARTNERS & INVESTORS

5.1 Team Members

Ctomorrow is backed by a team consisting of 17 members, comprising 7 members in the management team and 10 technical staffs.

The work experience of core members is involved in blockchain, payment-related technology, data, and business fields. The educational background of core team members is not disclosed in full.

▸ Ctomorrow Team Composition

Source: Ctomorrow, TokenInsight

Eric Tan - Director

Eric Tan is an experienced entrepreneur with a strong understanding of finance. He now heads CTomorrow to bring real-life utility to the forefront of its operations.

Allen Jin - CIO

Allen Jin served as CTO and CISO in multiple companies and has experience in developing payment infrastructure.

Teddy Lee - CTO

Teddy has experience as CTO in Twolegend previously and possess experience in blockchain development such as DEX, Crypto Wallet.

5.2 Advisors

As disclosed, Ctomorrow has three advisors.

Kimmy Kim is a former public official at Korean National Tax service for 22 years and now provides tax & accounting services.

Brian Ku specialises in customs and foreign exchange investigations for foreign investment enterprises, and handle customs clearance and consulting services for import and export.

Young Son is a CPA holder with 20 years of experience in accounting and tax industry and has worked in multiple large and mid-sized firms providing accounting audits, consulting and tax related issues.

5.3 Partners

CTomorrow established relationships with a number of Web3 companies. It partnered with Fomo pay and Coinhako to provide settlement services between fiat and crypto, and partnered with Stripe to provide credit card payment in Ctomorrow app. The platform has also created a system where users can pay with \$CTP offline, partnering with IvendPay to allow offline crypto payments in the form of a vending machine.

As a health and tech-beauty platform, CTomorrow established a strong partnership with the cosmetic manufacturer and seller, COSBALL. Users can purchase their products within the CTomorrow App using the \$CTP Token. In addition, the business structure and legality of all things related to blockchain and the \$CTP Token is reviewed by Crypto Business Law Consulting Firm, Cha & Kwon Law Offices.

▸ Ecosystem Partners

Source: Ctomorrow, TokenInsight

5.4 Investors

Ctomorrow conducted a private round token sale in September 2021. This funding round raised \$6.3 million by selling 873 million \$CTP token at \$0.0072. There is no institutional investors, only personal investors participated in this funding round.

06.

ECOSYSTEM

DEVELOPMENT

6.1 Community Operation

As of Jun. 06, 2024, Ctomorrow is operating communities on two platforms, X and Telegram. Among them, X has the largest number of subscribers, 22,400 for the English X account and 15,783 for the Korean X account. Overall, Ctomorrow has accumulated modest numbers of followers, however the community is relatively inactive based on posts' status and posting frequency.

▶ Number of Followers on Ctomorrow Main Social Platforms

Source: TokenInsight, 06 Jun 2024

No	Social Platform	Followers
1	X English	22.4k
2	X Korean	15.7K
3	Telegram_Community English	18.5K
4	Telegram_Community Korean	11.3K

6.2 Governance

As disclosed, Ctomorrow has no plan to adopt decentralized governance.

6.3 Ecosystem

Ctomorrow has launched its apps on both iOS and Android. As disclosed, the daily active users is 450, total download amount is over 500, and total users amount is 110,000. There has been over 15 million skin data provided.

Symbols and Definition of Risk Ratings

- AAA** The underlying technology is exceptionally solid and secure, and the ecosystem is exceptionally thriving and stable. The native token is utilized by a large decentralized community of supporters. The current health status and the searchable record of sustained growth indicate the project's incredible qualification and exceptionally low level of risk.
- AA** The underlying technology is very solid and secure, and the ecosystem is very thriving and stable. The native token is utilized by a large community of supporters. The current health status and the searchable record indicate the project's excellent qualifications and a very low level of risk.
- A** The underlying technology is solid and secure, and the ecosystem is thriving and stable. The native token is utilized by a community of supporters. The current health status indicates the project's awesome qualifications and low level of risk.
- BBB** The technical feasibility is very good, and the ecosystem growth is very strong. Although its native token has not yet been adopted on a large scale, its community of supporters has taken shape. The current growing status indicates the project's great qualifications and highly controllable risk.
- BB** The technical feasibility is good, and the ecosystem growth is strong. Most of the key milestones in the roadmap have been achieved, but the project has not yet been adopted well. The strong track record of achieving milestones indicates the project's good qualifications and controllable risk.
- B** The technical feasibility is moderate, and the ecosystem growth is stable. The project has maintained a high degree of alignment with the roadmap, but there are still several key milestones that need to be achieved. The track record of developing in line with the roadmap indicates that the project's risk is controllable to a limited extent.
- CCC** The technical idea and application scenarios are reasonable. The project is still in the early stages of development and advancing in accordance with the roadmap. The many uncertainties that still need to be faced in the development indicated the project's moderate level of risk.
- CC** The technical idea has certain problems, and the application scenarios are limited. The project demonstrates moderate progress and has reached some milestones, despite delays. The project exhibits moderate indications of progress but faces a substantial level of risk.
- C** The technical idea has considerable problems, and the application scenarios are highly limited. The progress disclosures are not clear or progress is lagging far behind the roadmap. Hardly any progress indicated the project's high level of risk.
- D** The project has an extremely high possibility of failure or has already failed. The project has been left unattended and with a high level of risk.
