TOKEN ECONOMICS

Bitget Token (BGB) is the native platform token for the centralized exchange Bitget and the Bitget Web3 ecosystem. As a utility token, BGB can be used for trading fees, VIP privileges, Bitget Wallet services, and participation in Launchpool and Launchpad, among other benefits.

3.1 Token Utility

As it stands, Holding BGB unlocks access to both Bitget's exchange and Web3 platforms. Additionally, Bitget has stated that BGB will expand its use cases in the future.

BGB Current Utility

- **Token Farming:** Users can stake BGB through Bitget Launchpool to receive token airdrops and participate in Bitget PoolX with BGB to earn passive income.
- **Token Launch:** Users can participate in Bitget Launchpad with BGB to subscribe the early-stage potential projects.
- **Fee Discount:** Users can pay spot transaction fees with BGB to enjoy a 20% discount.
- **VIP Privileges:** Users can hold BGB to upgrade Bitget VIP level and unlock additional perks.

BGB Future Benefits

BGB will integrate with Bitget Pay and Bitget Card according to the disclosed roadmap, expanding its utility with additional PayFi applications.

Bitget will enhance BGB's on-chain trading capabilities and liquidity, expanding its DeFi applications and airdrop eligibility.

3.2 Tokenomics

BGB token is an ERC20 token based on the Ethereum blockchain. Based on initial tokenomics, 20% of the total BGB supply is allocated to Team Incentives, 15% to Promotion, and 15% to User Commitment, with a clear vesting plan in place. According to the latest update, the total supply and circulating supply of BGB is 1,169,993,095, with the max supply is 2,000,000,000. It is worth noting that all BGB tokens are now fully in circulation. The detailed token distribution is displayed below:

Symbols and Definition of Risk Ratings

- AAA** The underlying technology is exceptionally solid and secure, and the ecosystem is exceptionally thriving and stable. The native token is utilized by a large decentralized community of supporters. The current health status and the searchable record of sustained growth indicate the project's incredible qualification and exceptionally low level of risk.
- AA** The underlying technology is very solid and secure, and the ecosystem is very thriving and stable. The native token is utilized by a large community of supporters. The current health status and the searchable record indicate the project's excellent qualifications and a very low level of risk.
- A** The underlying technology is solid and secure, and the ecosystem is thriving and stable. The native token is utilized by a community of supporters. The current health status indicates the project's awesome qualifications and low level of risk.
- BBB** The technical feasibility is very good, and the ecosystem growth is very strong. Although its native token has not yet been adopted on a large scale, its community of supporters has taken shape. The current growing status indicates the project's great qualifications and highly controllable risk.
- BB** The technical feasibility is good, and the ecosystem growth is strong. Most of the key milestones in the roadmap have been achieved, but the project has not yet been adopted well. The strong track record of achieving milestones indicates the project's good qualifications and controllable risk.
- B** The technical feasibility is moderate, and the ecosystem growth is stable. The project has maintained a high degree of alignment with the roadmap, but there are still several key milestones that need to be achieved. The track record of developing in line with the roadmap indicates that the project's risk is controllable to a limited extent.
- CCC** The technical idea and application scenarios are reasonable. The project is still in the early stages of development and advancing in accordance with the roadmap. The many uncertainties that still need to be faced in the development indicated the project's moderate level of risk.
- CC** The technical idea has certain problems, and the application scenarios are limited. The project demonstrates moderate progress and has reached some milestones, despite delays. The project exhibits moderate indications of progress but faces a substantial level of risk.
- C** The technical idea has considerable problems, and the application scenarios are highly limited. The progress disclosures are not clear or progress is lagging far behind the roadmap. Hardly any progress indicated the project's high level of risk.
- D** The project has an extremely high possibility of failure or has already failed. The project has been left unattended and with a high level of risk.
